	<b>HISTORY OF CHANGES</b>
<b>PUBLICATION DATE</b>	<b>NOTES</b>
01/02/2024	First version (rev. 1)
01/03/2024	Final version (FINAL)

## 1. Executive Summary

Following the instructions reported into the Dissemination Plan (D6.2), the partner (ISIM) in charge of managing the implementation of a WEBSITE DEDICATED TO THE PROJECT activate the selection process in the last quarter of 2023 and promptly selected the best offer. ISIM delivered the web scheme and the contents to the service provider selected and start a profitable interaction which allowed to get a good result within the time scheduled.

In fact, the WEBSITE ([www.zerostonewaste.eu](http://www.zerostonewaste.eu)) has been published the 29 of February 2024 with the most updated contents available at the date.

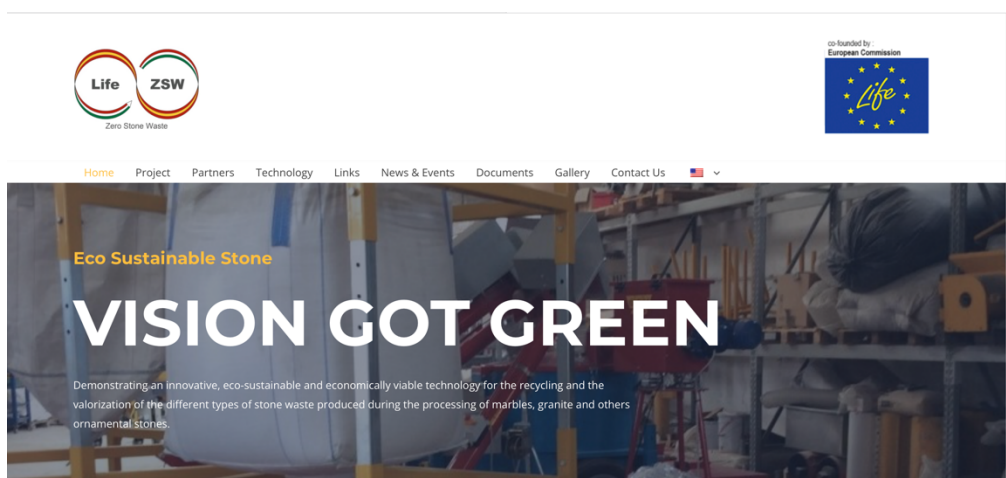

The first version of the Website is in English and Italian. During 2025 it's planned to publish a Spanish version, for supporting the activities which will be implemented in Spain.

The service provider, following the agreements with the responsible partner (ISIM), will publish all the NEWS, DOCUMENTS, IMAGES, VIDEO, etc. which will be delivered to him, after a revision and approval of ISIM itself.

Being the website the "real" deliverable (D6.1), this document is just a support for evidencing the release of the mentioned deliverable.

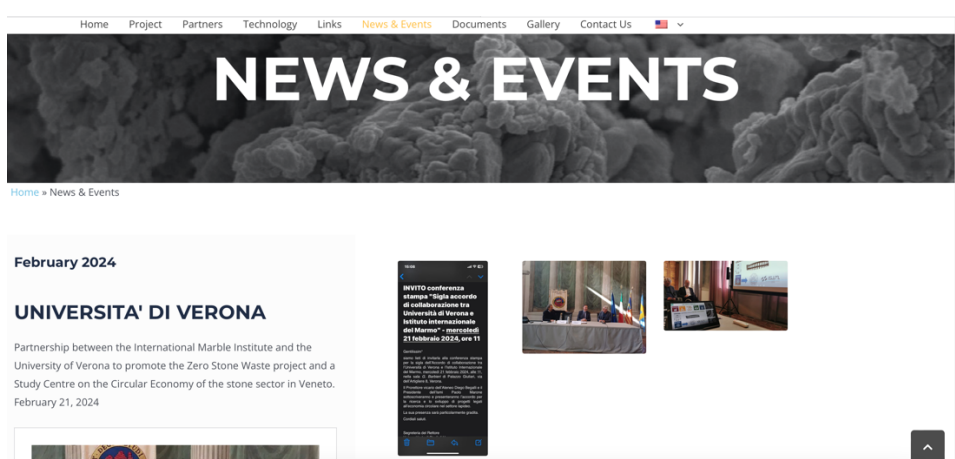

## 2. WEB Contents

The website start showing its HOME PAGE:

Where it's possible to select the language (English or Italian), scroll the pages with most relevant information related to the project or select an entry into the MAIN MENU:

- HOME: return to the home page
- PROJECT: key data and details about the LIFE ZSW project
- PARTNERS: short description of the project partners
- TECHNOLOGY: a summary of the technology under the ZSW plant
- LINKS: useful links to other projects or relevant stakeholders
- NEWS & EVENTS: the notice board which will collect all the important information related to events, new, etc. concerning the project, the partners and the stone sector in general.

- DOCUMENTS: area where everybody could download the “public” documents
- GALLERY: photos and videos useful for better understanding the technology, the activities and the project results
